Introduction

Feedback from the stakeholders are the key element in imparting quality in higher education. Curriculum of the courses taught in a programme should be carefully designed and implemented to ensure high standard. At amal college we have been taking feedback from all stakeholders. Students are being the core beneficiaries of higher education, we have collected exhaustive feedback from them on curriculum design and implementation.

Methodology of data collection and analysis

We have used a structured Google form questionnaire for collecting responses online from all our students at the end of every academic year. Qualitative statements in five point agreement scale were used to study students feedback. Basic profile analysis and descriptive analysis of students feedback for various dimensions of curriculum are done.
